

# IF SEM-2C(H)

for Volvo FH4B / FM4B / FMX4B trucks with SEM2 Module

**For a correct operation of this interface, the Volvo truck must be equipped with a BBM (Body Builder Module), order code: ECBB-HIG**

This plug and play IF SEM-2C(H) interface for two analog cameras (with or without motorized shutter), only works if the Volvo truck is equipped with a SEM2 and BBM module.

**After installation, software programming of the truck (by a Volvo workshop) is necessary to utilize all functions of this interface.**

Location of the 5-pin green XC164 connector and BBM Module is under the fuse box in the center of the dashboard

XC164 connector

- 1. Body Builder Module (BBM)
- 2. Fuse and relay box BBM
